pymozrepl Firefox MozREPL Add-on Python Interface . [mozrepl](#) . . .
<https://github.com/Thestars3/pymozrepl>.

pymozrepl Firefox MozREPL Add-on Python Interface .

1.1

- firefox mozrepl .
- firefox mozrepl .
- firefox mozrepl Python .
- javascript object .
- ...

1.2

, mozrepl Firefox Add-on addons.mozilla.org , .

```
>>> import mozrepl
>>> repl = mozrepl.Mozrepl()
>>> repl.execute('window')
[object ChromeWindow] - {0: {...}, 1: {...}, 2: {...}, 3: {...}, 4: {...}, close: function() {...},
>>> list(repl.execute(u'["a", 1, 2, 3, 4]'))
[u'a', 1, 2, 3, 4]
>>> repl.execute('content').document.title
u'pymozrepl \u2014 mozrepl 0.1a8 documentation'
>>> import mozrepl.util
>>> for cookie in mozrepl.util.getCookiesFromHost(repl, '.cpan.org'):
...     break
...
>>> cookie
Cookie(version=0, name=u'css', value ...
```

1.6

<w7dn1ng75r@gmail.com>

1.7

2.7 .

1.8

1.9

: <https://github.com/Thestars3/pymozrepl>.

Note: mozrepl 2.7.

2.1 mozrepl

```
pip .
$ pip install mozrepl
PyPI .
$ python setup.py install
```

2.2

PyPI Github .

3.1

```
class mozrepl.Mozrepl (port=4242, host=u'127.0.0.1')  
Bases: object
```

Firefox MozREPL Add-on .
with .

Parameters

- **port** (*int*) – mozrepl Firefox Add-on .
- **host** (*unicode*) – mozrepl Firefox Add-on .

DEFAULT_HOST = u'127.0.0.1'

DEFAULT_PORT = 4242

connect (*port=None, host=None*)
mozrepl Firefox Add-on .

Parameters

- **port** – mozrepl Firefox Add-on . , .
- **port** – mozrepl Firefox Add-on . , .

disconnect ()
mozrepl Firefox Add-on .

, .

execute (*command*)

Attention: , ‘repl.execute(“repl.home”)()’ . . . , ‘repl.execute(“repl.home.call”)(Raw(“repl”))’
, ‘repl.execute(“repl”).home()’ pymozrepl .

Attention: pymozrepl . Firefox mozrepl .

Attention: javascript repl object .

Parameters `command` (`unicode`) – .
Raises `mozrepl.Exception` mozrepl Firefox Add-on .
Returns `Object` : mozrepl Firefox Add-on object .
Returns `Array` : mozrepl Firefox Add-on array .
Returns `Function` : mozrepl Firefox Add-on function .
Returns string, number, bool python (int, bool, unicode) .

```
class mozrepl.Exception(error)
Bases: exceptions.Exception

mozrepl Firefox Add-on .
javascript Error ., .
, javascript object , __getitem__ .
__contains__ .
```

3.2 type

```
class mozrepl.type.Object(repl, uuid)
Bases: object

javascript object .

•(__getitem__, __setitem__, __delitem__).
•(__getattr__, __setattr__, __delattr__).
•__eq__, __contains__ .

,
,
.

>>> import mozrepl
>>> repl = mozrepl.Mozrepl()
>>> a = repl.execute('repl')
>>> b = repl.execute('repl')
>>> a == b # __eq__
True
>>> '__name' in a # __contains__
True
>>> a.__name # __getattr__
u'repl'
>>> a['__name'] # __getitem__
u'repl'
>>> a['__name'] = 'pymozrepl' # __setitem__
>>> a['__name']
u'pymozrepl'
>>> del a.__name # __delattr__
>>> a.__name
None
>>> for key, value in a: # __iter__
...
__iter__()
javascript Object iterator .
```

```

Yield value; '__iterator__' , Iterator .
Yield , (key, value) .

__unicode__(self)
    .
    ,
    .,
    .

    >>> import mozrepl
    >>> repl = mozrepl.Mozrepl()
    >>> obj = repl.execute('window')
    >>> unicode(obj)
u'__pymozrepl_c8d7323280c54d09809e2dd7d34d1c70.ref["1e1c7ae3-c1fc-4664-b57f-1281bdc1c996"]'
    >>> repl.execute('var value = {reference}'.format(reference=obj))

classmethod makeNotinitiated(repl)
    .

Parameters repl (Mozrepl) – mozrepl.Mozrepl
Returns Object .
Return type Object

class mozrepl.type.Array (repl, uuid)
Bases: mozrepl.type.object.Object
javascript array .

__len__, __iter__ .

    .
    .

    >>> import mozrepl
    >>> repl = mozrepl.Mozrepl()
    >>> array = repl.execute('[1,2,3,4,5,10]')
    >>> len(array) # __len__
6
    >>> list(array) # __iter__
[1, 2, 3, 4, 5, 10]

__iter__(self)
    javascript Object iterator .
Yield value; 0 ~ yield.

class mozrepl.type.Function (repl, uuid)
Bases: mozrepl.type.object.Object
javascript function .

    .
    .

    >>> import mozrepl
    >>> repl = mozrepl.Mozrepl()
    >>> func = repl.execute(' (function(){ return "mozrepl"; })') #__call__
    >>> func()
u'mozrepl'
    >>> repl.execute('window').toString() #__call__
u'[object ChromeWindow]'

__call__(*args)
    javascript Function object .

```

```
    convertToJs() .  
class mozrepl.type.Raw (code)  
. .  
    convertToJs() , .  
Parameters code (unicode) – .
```

3.3 util

```
mozrepl.util.convertToJs (obj)  
    javascript .  
Parameters obj (Object, Function, Array, Raw python .) – . . list tuple ,  
    convertToJs () .
```

Returns JSON string

Return type unicode

```
mozrepl.util.getAllTabs (repl)
```

Parameters repl (Mozrepl) – mozrepl .

Yield Object .

```
mozrepl.util.getCookiesFromHost (repl, host)
```

Returns an generator of cookies that would be returned to a given host, ignoring the cookie flags isDomain, isSecure, and isHttpOnly. Therefore, if the specified host is “weather.yahoo.com”, host or domain cookies for “weather.yahoo.com” and “yahoo.com” would both be returned, while a cookie for “my.weather.yahoo.com” would not.

Parameters

- **repl** (Mozrepl) – mozrepl.Mozrepl
- **host** (unicode) – The host unicode string to look for, such as “google.com”. This should consist only of the host portion of the URI and should not contain a leading dot, port number, or other information.

Yield An cookielib.Cookie objects representing the matching cookies.

```
mozrepl.util.openTab (repl, url, isPrivate=False, inNewWindow=False, inBackground=False,  
                     isPinned=False)
```

Opens a new tab. The new tab will open in the active window or in a new window, depending on the inNewWindow option.

Parameters

- **repl** (Mozrepl) – mozrepl .
- **url** (unicode) – String URL to be opened in the new tab. This is a required property.
- **isPrivate** (bool) – bool which will determine whether the new tab should be private or not. If your add-on does not support private browsing this will have no effect. See the private-browsing documentation for more information. Defaults to false.
- **inNewWindow** (bool) – If present and true, a new browser window will be opened and the URL will be opened in the first tab in that window. This is an optional property.

- **inBackground** (*bool*) – If present and true, the new tab will be opened to the right of the active tab and will not be active. This is an optional property.
- **isPinned** (*bool*) – If present and true, then the new tab will be pinned as an app tab.

4.1 v1.2.3

- , ‘Exception AttributeError: “‘Mozrepl’ object has no attribute ‘_baseVarname’” in <bound method Mozrepl.__del__ of Mozrepl(port=4242, host=u‘127.0.0.1’)> ignored’ . [tb69wn6127]

4.2 v1.2.2

- Mozrepl with exit . [tb69wn6127]

4.3 v1.2.1

- __iter__ ‘Iterator’ . [tb69wn6127]
- , json . [tb69wn6127]

4.4 v1.2.0

- mozrepl.util openTab . [tb69wn6127]

4.5 v1.1.3

- tpye.Object __repr__ . [tb69wn6127]

4.6 v1.1.2

- Firefox MozREPL(Firefox MozREPL 1.1.2) , ‘mozrepl.exception.Exception: repl is not defined’ . [tb69wn6127]

4.7 v1.1.1

- Firefox MozREPL 1 , ‘ValueError: No JSON object could be decoded’ . [tb69wn6127]
- Object ‘__iterator__’ iter ,‘__iterator__’ . [tb69wn6127]
- Object repr ,null,object ‘[Exception!]’ . [tb69wn6127]
- Exception ‘TypeError: ‘NoneType’ object is not callable’ . [tb69wn6127]
- Exception . [tb69wn6127]
- execute , “KeyError: u’refUuid”” . [tb69wn6127]
- undefined, null . [tb69wn6127]

4.8 v1.1.0

- mozrepl.util.getAllTabs . [tb69wn6127]
- mozrepl.Mozrepl , . [tb69wn6127]
- object repr ,‘TypeError: __repr__ returned non-string’ . [tb69wn6127]

4.9 v1.0.6

- , . [tb69wn6127]
- mozrepl.util.getCookiesFromHost . [tb69wn6127]

4.10 v1.0.5

- mozrepl.Exception __getitem__, __contains__ . [tb69wn6127]

4.11 v1.0.4

- mozrepl.Mozrepl.execute , (‘repl\d*>’) . [tb69wn6127]
- mozrepl.Mozrepl.execute -inf long . [tb69wn6127]
- . [tb69wn6127]
 - mozrepl.Exception javascript . [tb69wn6127]
 - . [tb69wn6127]
- mozrepl.Mozrepl.connect , . [tb69wn6127]

4.12 v1.0.3

- mozrepl.util.convertToJs json . [tb69wn6127]

4.13 v1.0.2

- mozrepl.util.convertToJs long . [tb69wn6127]

4.14 v1.0.1

- mozrepl.util.convertToJs bool . [tb69wn6127]

4.15 v1.0.0

- . [tb69wn6127]
- mozrepl.util.getCookiesFromHost . [tb69wn6127]

4.16 v0.1b7

- Object makeNotinitied . [tb69wn6127]

4.17 v0.1b6

- Mozrepl.execute , ‘UnicodeEncodeError: ‘ascii’ codec can’t encode character’ . [tb69wn6127]

4.18 v0.1b5

- mozrepl.util.convertToJs dict . [tb69wn6127]
- mozrepl.type.Raw mozrepl.util.convertToJs . [tb69wn6127]

4.19 v0.1b4

- object reference , Object.__unicode__ . [tb69wn6127]

4.20 v0.1b3

- util.getCookiesFromHost . [tb69wn6127]

4.21 v0.1b2

- tuple list javascript . [tb69wn6127]
- type.Function.__call__ kwargs . [tb69wn6127]
- util.getCookiesFromHost . [tb69wn6127]
- Mozrepl.execute 'IOError: [Errno 24] Too many open files' . [tb69wn6127]

4.22 v0.1b1

- Object iterator . [tb69wn6127]

4.23 v0.1a14

- execute , Object . [tb69wn6127]

4.24 v0.1a13

- Mozrepl.execute for while js . [tb69wn6127]
- Firefox MozREPL 1.1.2 UNICODE (ASCII ‘socket.error: [Errno 32] Broken pipe’) . [tb69wn6127]

4.25 v0.1a12

- mozrepl.Mozrepl.execute type . [tb69wn6127]
 - nolastcmd . [tb69wn6127]
 - noreturn _rawExecute . [tb69wn6127]
 - repr _rawExecute . [tb69wn6127]

4.26 v0.1a11

- . [tb69wn6127]

4.27 v0.1a10

- type.Function __call__ . [tb69wn6127]

4.28 v0.1a9

- js object __del__ . [tb69wn6127]
- js array __len__ . [tb69wn6127]
- js object __contains__, __eq__ . [tb69wn6127]

4.29 v0.1a8

- array type . [tb69wn6127]
- util.convertToCmd . [tb69wn6127]

4.30 v0.1a7

- mozrepl.type.Function ‘TypeError: context is undefined’ . [tb69wn6127]

4.31 v0.1a6

- mozrepl.Mozrepl __repr__ . [tb69wn6127]
- mozrepl.type.Object ‘ReferenceError: x is not defined’ . [tb69wn6127]
- mozrepl.util.convertToJs . [tb69wn6127]
- **mozrepl.type.Function __call__ . [tb69wn6127]**
 - . [tb69wn6127]
 - ‘ . [tb69wn6127]
 - int, None, float, str, mozrepl.type.Object . [tb69wn6127]

4.32 v0.1a5

- mozrepl.type.Function ‘TypeError: must be type, not Function’ . [tb69wn6127]
- mozrepl.Mozrepl.for_ . [tb69wn6127]
- mozrepl.Mozrepl.execute Array . [tb69wn6127]
- mozrepl.type.Object , . [tb69wn6127]

4.33 v0.1a4

- Mozrepl.execute float . [tb69wn6127]
- Mozrepl.execute string . [tb69wn6127]

4.34 v0.1a3

- Mozrepl.execute type . [tb69wn6127]
- Mozrepl.execute object . [tb69wn6127]
- Mozrepl.execute function . [tb69wn6127]

4.35 v0.1a2

- Mozrepl.execute mozrepl string “ , . [tb69wn6127]

4.36 v0.1a1

- pymozrepl . [tb69wn6127]
